

B1

Zoning & FAR

The project site falls within the Special Hudson Yards District, established through NYC zoning amendments (Zoning Resolution Article IX, Chapter 3) to guide development on Manhattan's Far West Side. The district encompasses multiple subdistricts with varying density allowances, typically zoned C6-4 through C6-9. For community facility uses such as a museum, the maximum FAR can reach 10.0 to 15.0 depending on the specific subdistrict and applicable bonuses tied to public improvements, transit infrastructure, and affordable housing contributions. Height and setback regulations follow the tower-on-base model typical of high-density Manhattan zoning, with street wall requirements along major avenues and flexible setback conditions above the base height. The faceted form of the Hyperobject project reinterprets this framework: the extended base fulfills street wall requirements while the non-orthogonal upper volume operates within the flexible setback provisions. Lot coverage at the base generally permits 65–100% depending on block and lot configuration.

- Address: 260 12th Avenue, Manhattan, BBL 1006750001 (Block 675, Lot 1)
- Zoning district: M1-6 (Light Manufacturing, highest density); Community District 4
- Lot area: 113,157 SF; frontage: 199.42 ft; depth: 525 ft
- Community facility FAR: 10.0 (base); up to 12.0 with public plaza bonus (ZR §43-14)
- Max allowable floor area: ~1,131,570 SF (at 10.0 FAR); ~1,357,884 SF (at 12.0 FAR)
- Tower permitted above 40% lot coverage; no side yards required; no lot coverage limit
- Height governed by sky exposure plane; towers may penetrate in M1-3 through M1-6
